Loading up Dominate Soundbar Control.

1. If your Media Player is Linux, navigate to our url and download DSC. Launch and then scan the QR code with your phone to add DSC to your portal.
2. If your tv is Android down load DSC from the play store. Scan the QR code with your phone to add DSC to your portal. (Currently running as an apk whilst in development)

Dominate Soundbar Control

Turn any Linux device into a retail demo station. Play videos, switch between Bluetooth soundbars, and manage content remotely from the cloud.

[Download for Linux](#)

Requires Ubuntu 20.04+ or Debian 11+ · x86_64 or ARM64

>_ Quick Install (one command)

```
$ tar xzf btswitch-linux.tar.gz && cd linux-tv && chmod +x install.sh && ./install.sh
```

Getting Started

- 1 [Download & Install](#)
Download the BTSwitch player package and run the installer on your Linux device.
 - ✓ Extract the downloaded archive
 - ✓ Run the install script (installs dependencies & sets up auto-start)
 - ✓ The player will launch automatically in fullscreen

Top Gun maverick Trailer

the Odyssey

Furiosa Mad Max Trailer

Avatar Fire and Ash

Spider man Brand New Day trail...

Thunderbolts Trailer

Top Gun Maverick

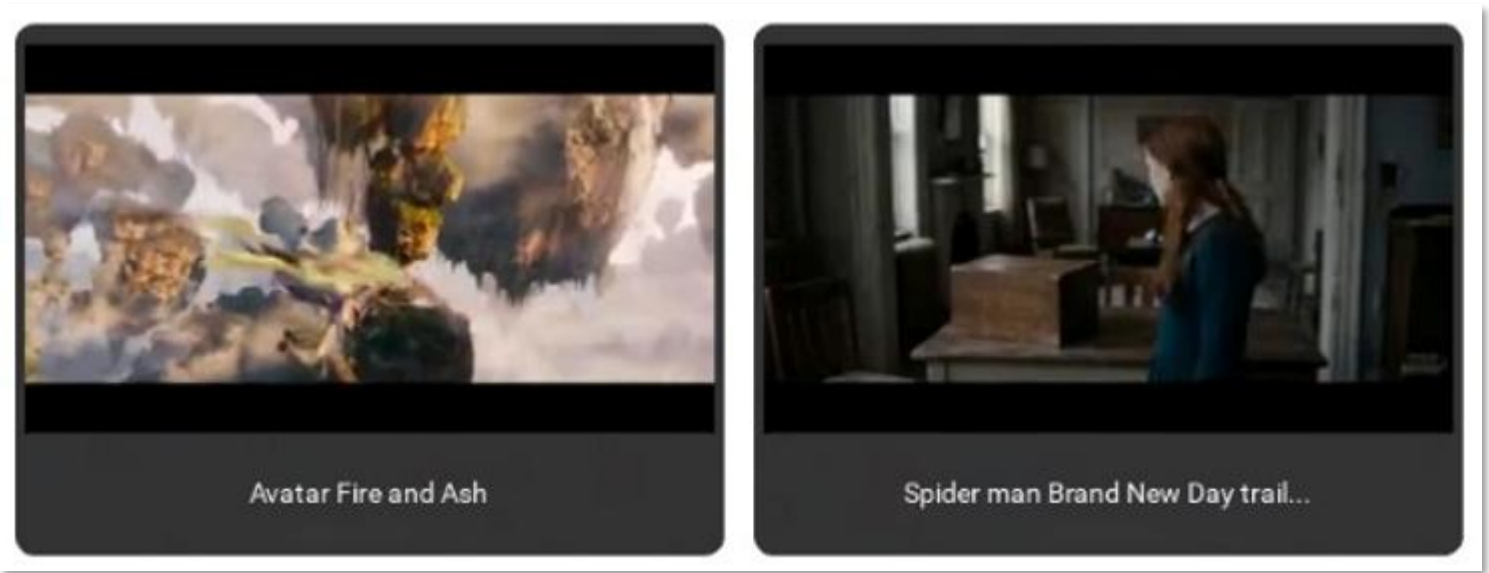

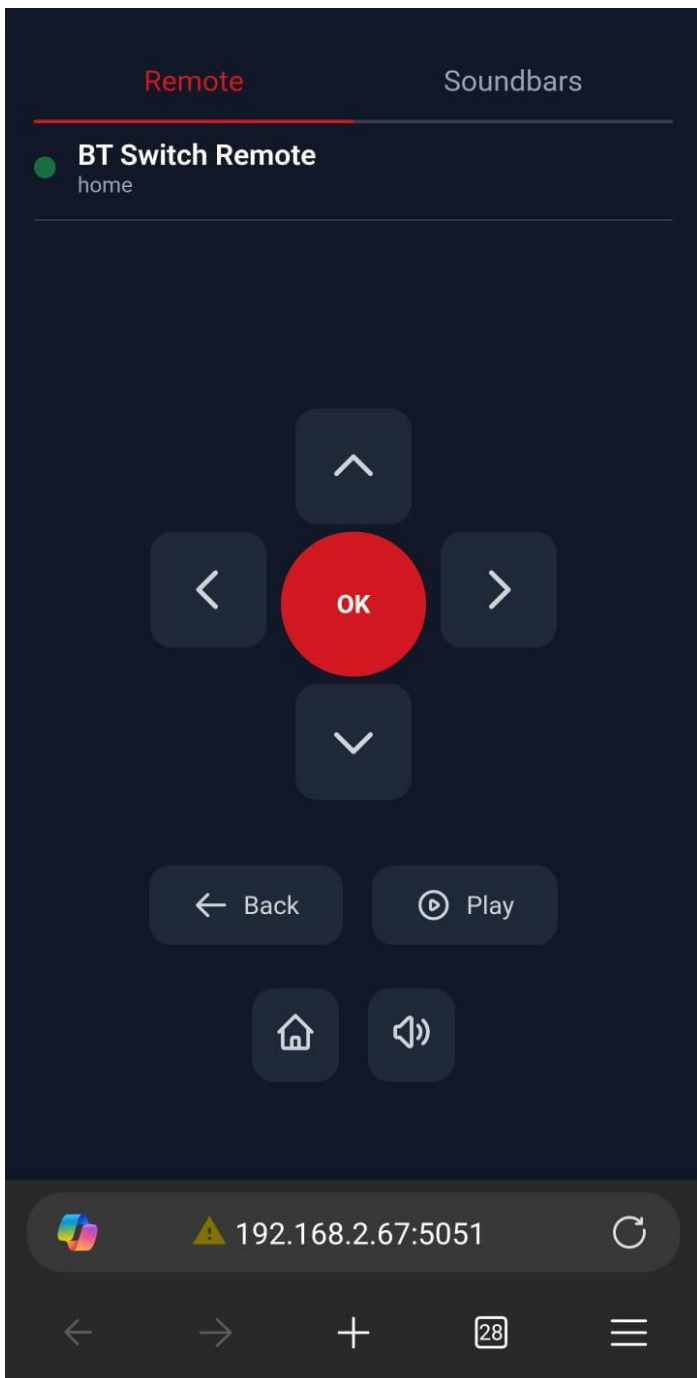

Deadpool Wolverine

Operate Dominate Soundbar Control in 1 of two ways.

1. If your tv is Android use the tv remote to access onscreen content and change sound bars..
2. If your tv is Linux scan the QR code with your phone and control the app with your phone as the remote control.

Using the left right up down arrow, select the movie clip you want to show on the screen, and click OK (Or use remote if Android TV)

Once movie starts, click the speaker icon on the remote which brings up the available soundbars. This is Bluetooth hardware dependant, this specific model can handle 4 continuous Bluetooth connections for seamless transitions. More Bluetooth Devices can be added, but will result in a 2 to 5 second delay depending on the Bluetooth of the Soundbar

Soundbars

Bluetooth devices connected

HOCO HC1 [Available]

HOCO HC17 [Available]

BS-10 [Unavailable]

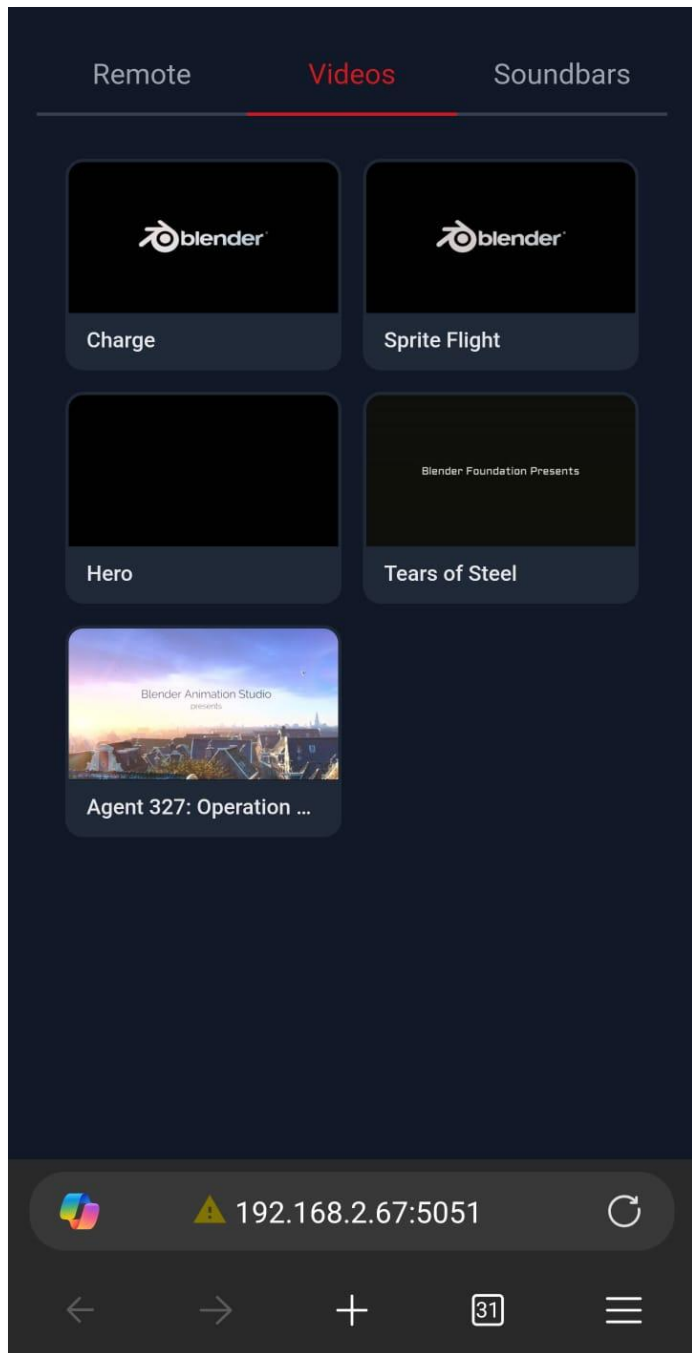

HOCO HC1 [Available]

-> HOCO HC36 [Active]

Up/Down + Enter | Esc to close

Scan to Control

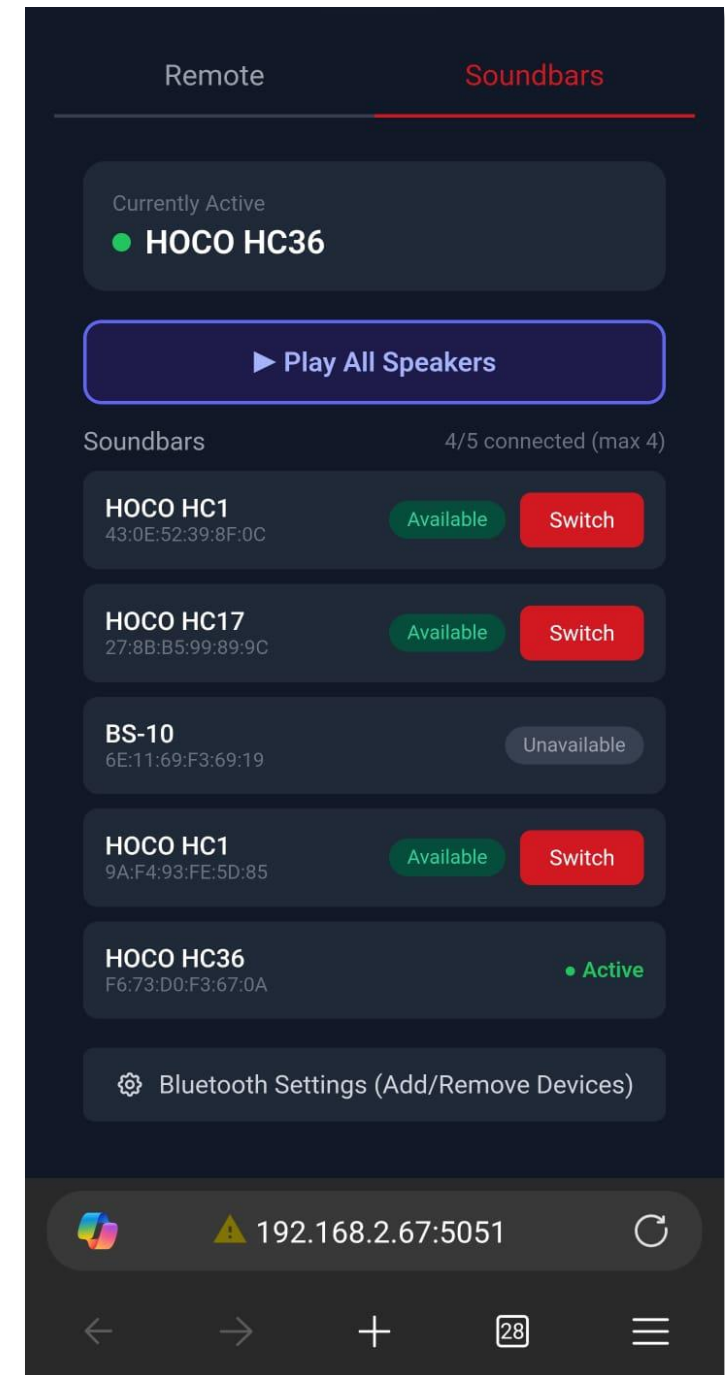

BYOD – Allow your sales person to use their own phone to control the demo.

Shortcut for videos added to phone remote as well.

The screen is where you set up which devices you need paired for the Demo.

The last screen is where you set up which devices you need paired for the Demo.

This system can be used as a standalone Media player with content uploaded from a centralised web based dashboard for distribution to different outlets, or multiple demo displays in one store
