

DOMINATE

# Hotel TV

Smart Room Entertainment & Guest Services Platform

---

Transforming hotel rooms with intelligent, managed TV experiences.

Powered by MN Group · Johannesburg, South Africa

# Hotel TV is stuck in the past

## Legacy systems are expensive

Traditional hospitality TV runs R15,000+ per room with long contracts, proprietary hardware and costly maintenance.

## Guests expect streaming

Travellers want their own Netflix, YouTube and DStv — not a fixed channel list. A blank or dated TV is a visible downgrade from home.

## Paper & disconnected services

Printed directories, phone-call room service and front-desk queues for the bill all add friction the modern guest no longer tolerates.

# Dominate Hotel TV

A complete smart-room platform on affordable Android TV hardware

## Branded home screen

Custom welcome, guest name, live clock, weather & background advertising.

## Guest streaming

Sign in to Netflix, YouTube, DStv, Disney+, Prime & more — wiped at checkout.

## Hotel services on TV

Digital directory, restaurant ordering and live folio — all from the remote.

## Centrally managed

One cloud dashboard controls every TV, every room, every property.

## PMS integrated

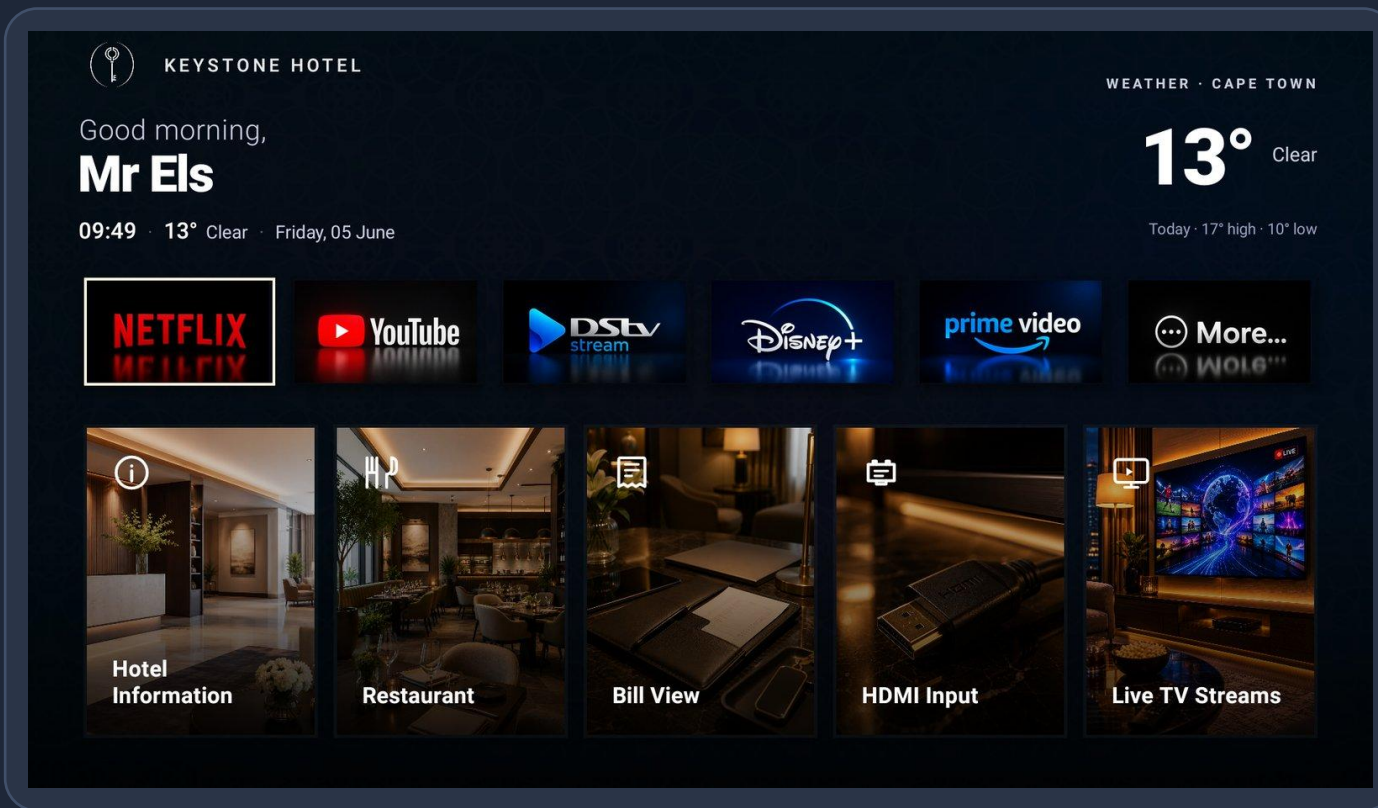

Guest name, folio and auto-checkout sync straight from your PMS.

## Locked-down kiosk

Android Device Owner mode — tamper-proof and guest-safe.

# A premium first impression

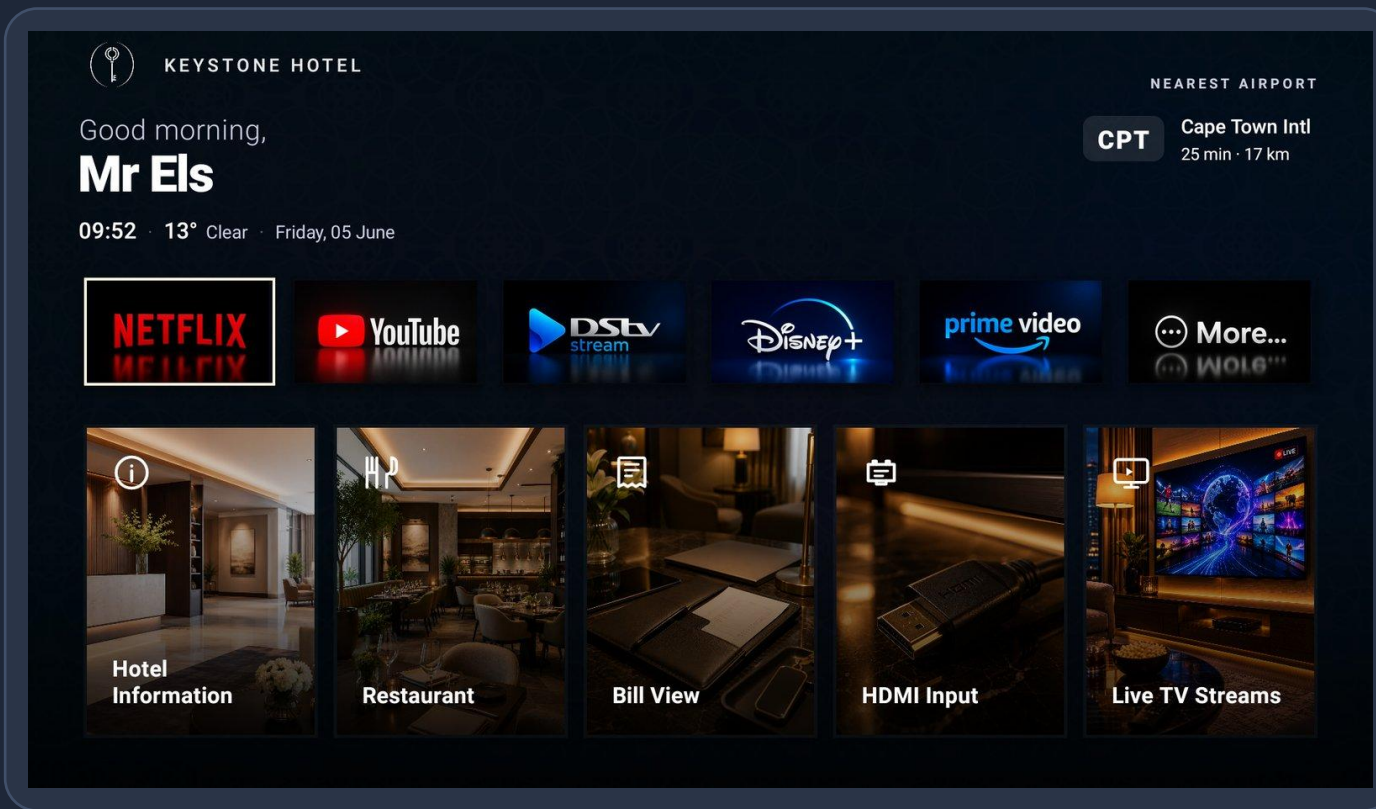

Personalised welcome the moment the guest walks in

- **Personalised greeting**  
Guest name, time-of-day welcome, live clock and date.
- **Live info banner**  
Weather and nearest-airport drive-time auto-cycle on the stage card.
- **Background advertising**  
Hotel-managed imagery and video behind the home screen.
- **One-press to everything**  
Streaming and hotel services a single click away on the remote.

# Everything from the remote

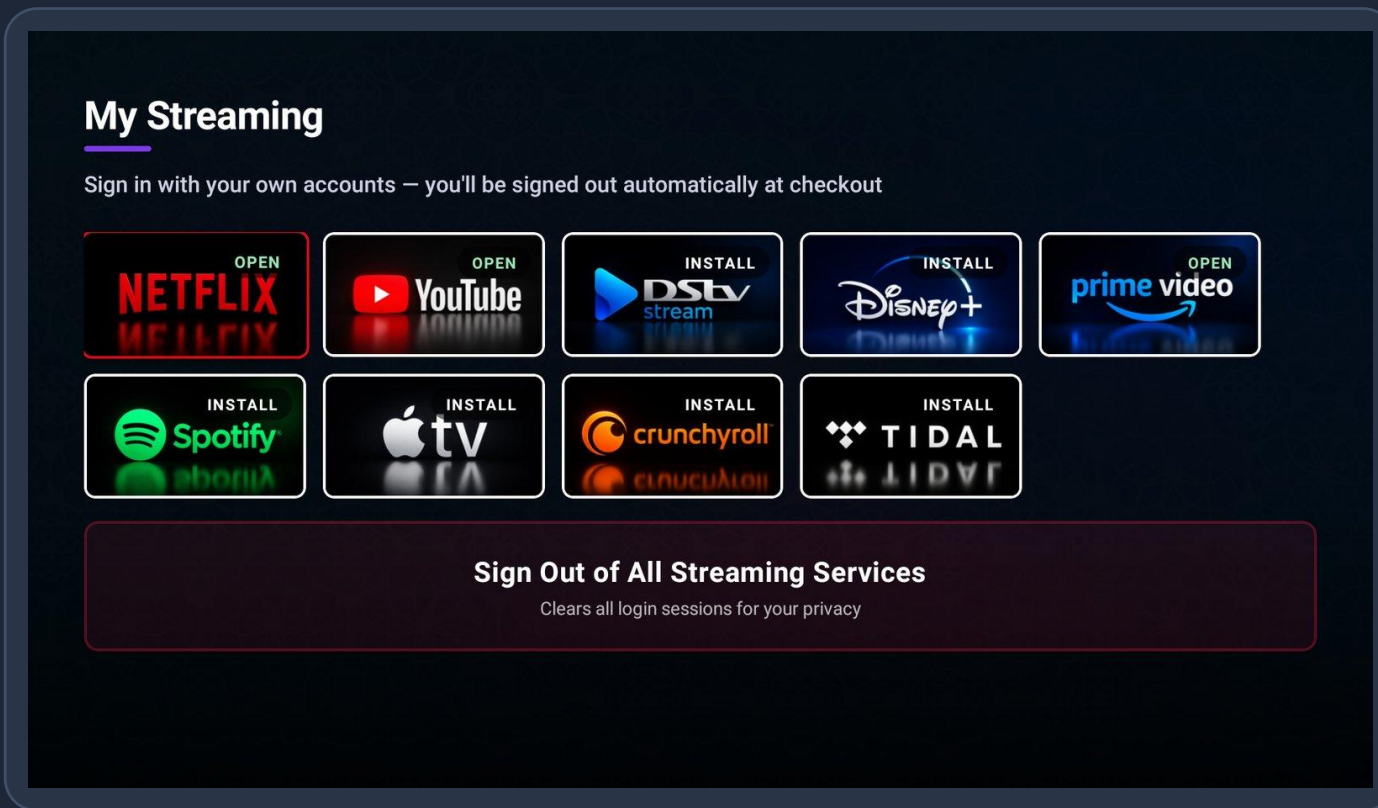

Google-TV-style shortcuts the guest already knows how to use

- **Streaming shortcut row**  
Netflix, YouTube, DStv, Disney+, Prime — and a 'More' catalog.
- **Hotel service cards**  
Hotel Info, Restaurant, Bill, HDMI input and Live TV.
- **Stage cards**  
Weather, airport ETA, checkout countdown and operator media.
- **Fully themeable**  
Layout, colours and branding configured per property.

# Their accounts, wiped at checkout

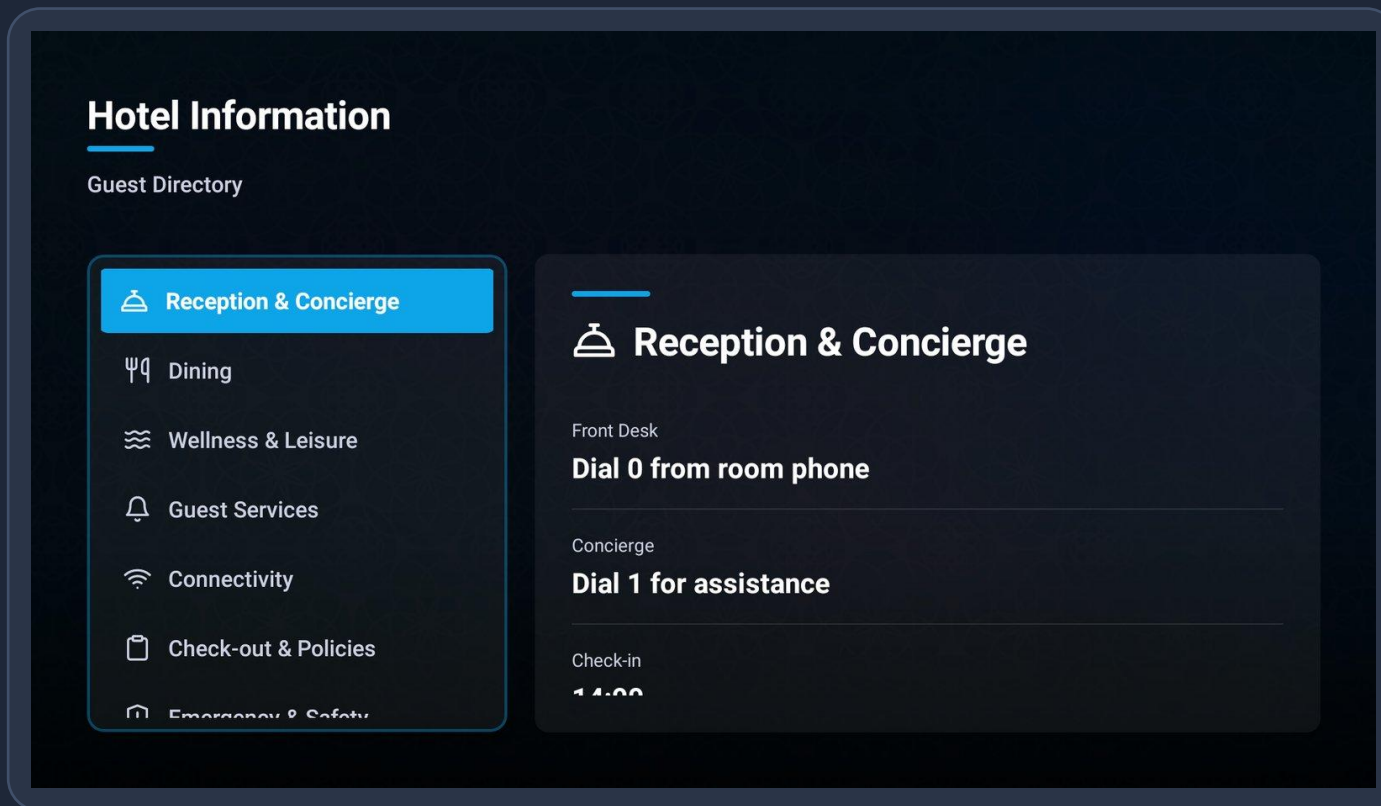

Guests sign in to their own subscriptions — privacy guaranteed

- **9-app catalog**  
Netflix, YouTube, DStv, Disney+, Prime, Spotify, Apple TV+, more.
- **Sign in with your own account**  
No hotel logins — guests use their existing subscriptions.
- **Sign Out of All**  
One button clears every streaming session for privacy.
- **Auto-wiped at checkout**  
All app logins and data cleared automatically on departure.

# A paperless guest directory

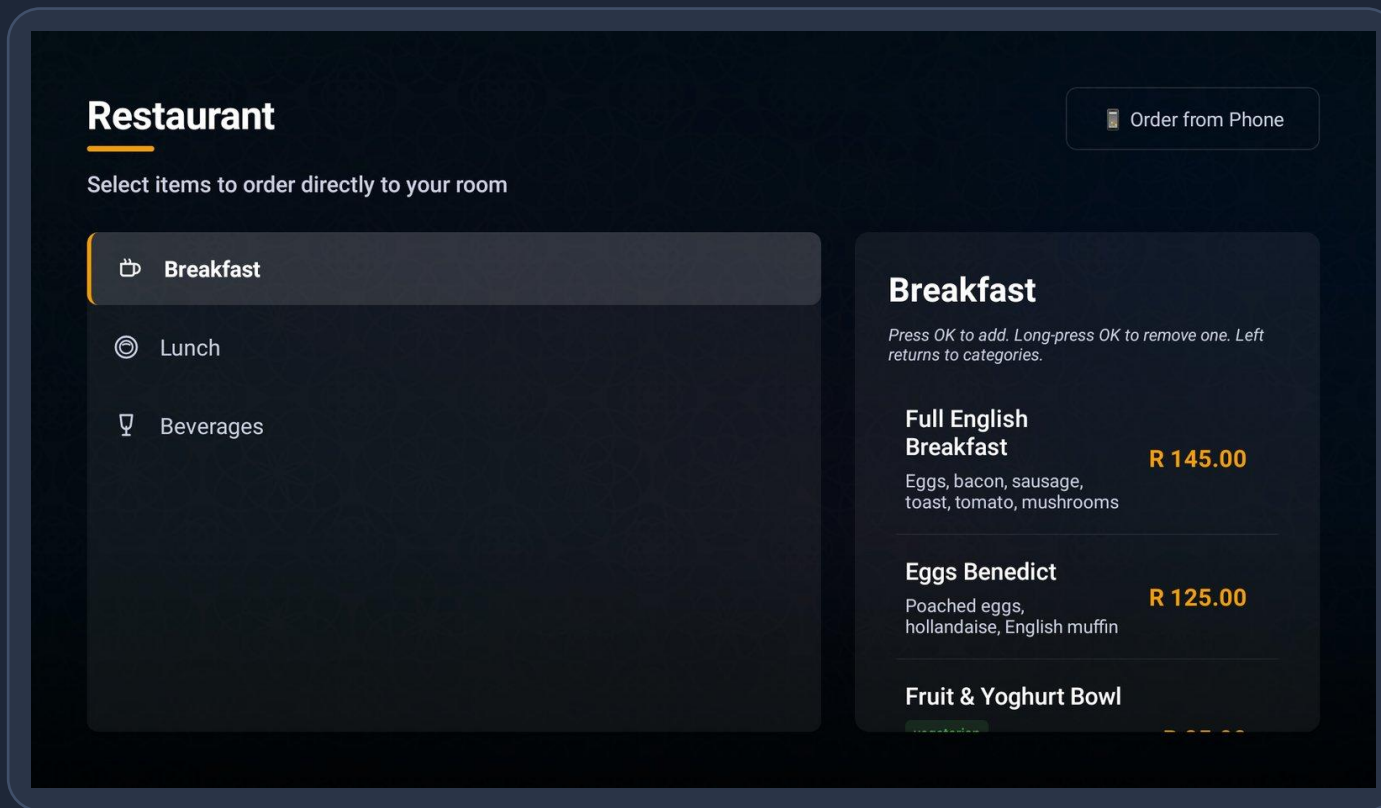

Reception, dining, spa, WiFi and emergency info — always current

- **Everything in one place**  
Reception, dining, wellness, services, connectivity, policies.
- **Always up to date**  
Edit centrally; every room reflects it instantly — no reprinting.
- **Clear remote navigation**  
Sidebar + detail layout designed for the TV remote.
- **Emergency & safety**  
Critical contacts and procedures one click away.

# Order to the room from the TV

Interactive menus with live ordering, posted straight to the folio

- **Rich interactive menus**  
Categories, descriptions, pricing and dietary detail.
- **Order to room**  
Build a cart and order without picking up the phone.
- **Order from phone**  
Scan the QR to order from a smartphone instead.
- **Posts to the folio**  
Charges flow straight onto the guest bill via the PMS.

# The live bill, on the TV

Real-time charges from the PMS — no front-desk queue

## Guest Folio

Room 101 · Mr Els

BALANCE DUE

R 600.00

Services

R 100.00

Spa & Wellness

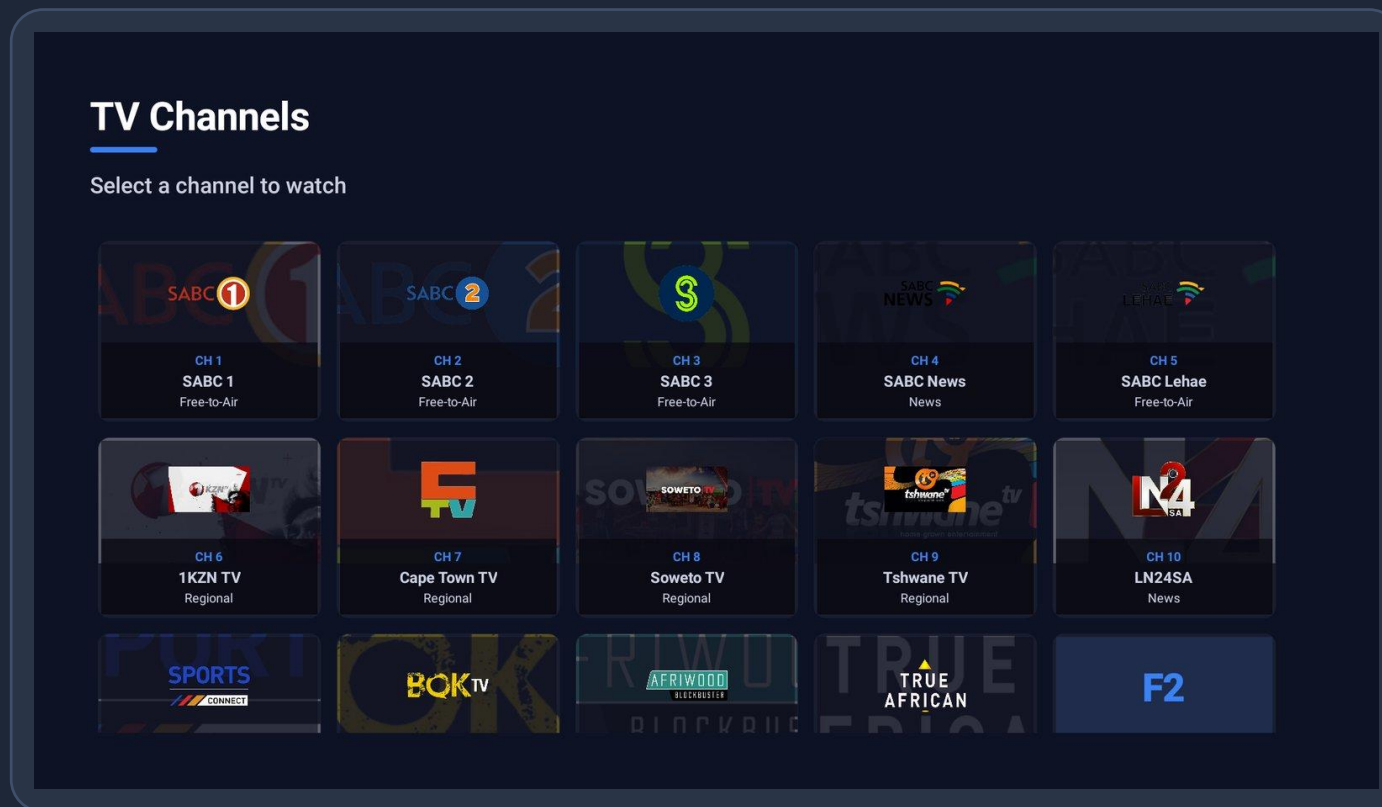

R 500.00

DESCRIPTION	DATE	CATEGORY	AMOUNT
Dry Cleaning	2026-06-05	Services	R 100.00
	2026-06-05	Spa & Wellness	R 250.00
	2026-06-05	Spa & Wellness	R 250.00
Total			R 600.00

- **Live balance**  
 Current balance due, updated as charges land.
- **Itemised & categorised**  
 Accommodation, F&B, spa and services, each dated.
- **Straight from the PMS**  
 Charges sync from your property management system.
- **Check-out confidence**  
 Guests review the bill in-room before departure.

# Local channels, beautifully presented

Free-to-air and regional channels in a modern guide

- **Curated channel grid**  
SABC, regional and news channels in a clean layout.
- **Branded & themed**  
Matches the hotel's look, not a generic tuner UI.
- **Works with your feed**  
Integrates with the hotel's existing IPTV or headend channel source.
- **Operator-managed**  
Channel line-up configured centrally per property.

# Control every TV from one dashboard

Cloud content management across rooms and properties

## Background advertising layer

Upload images and video to play behind the home screen.

## Scheduling & playlists

Different content for morning vs evening, per day-part.

## Per-property / per-room

Target content to a property, a floor or a single room.

## Branding & theming

Logo, colours and layout configured without a new build.

## Menus & directory

Update restaurant menus and hotel info live, everywhere at once.

## Fleet device management

Monitor, update and provision every TV remotely.

# Connects to your PMS

Live, working integrations available today

## Oracle OPERA

OHIP / OWS — Cloud & on-prem. The luxury & chain standard.

SUPPORTED

## Protel

Planet (Protel) — popular with boutique & independent hotels.

SUPPORTED

## Mews

Modern cloud PMS — open Connector API.

SUPPORTED

## NightsBridge

SA booking & channel manager — guest-data sync.

SUPPORTED

**Generic API connector** · Custom & local PMS integrations available on request.

# Locked-down & guest-safe

Android Device Owner kiosk mode — tamper-proof by design

## Lock Task (kiosk) mode

Guests can't exit the app, reach Android settings or install apps.

## Device Owner provisioning

Full MDM control — the TV is owned and managed, not just an app.

## Hidden staff access

A discreet gesture unlocks admin tools for housekeeping & IT only.

## Checkout data wipe

Streaming logins and guest data cleared automatically on departure.

## Remote lock & recover

Lost, stuck or tampered TVs recovered from the dashboard.

## No guest-visible OS

Guests only ever see the hotel experience — never raw Android.

# Guest Casting with Room Isolation

• COMING SOON

Let guests cast their phone straight to their own room's TV — safely, on shared hotel WiFi.

## How it works

- 1 Guest scans a QR code on their room's TV.
- 2 The Gateway server pairs that phone to that one TV.
- 3 Only the guest's own room appears in their Cast picker.
- 4 Session ends automatically at checkout.

## Why it matters

- **True room isolation**  
A guest can never cast to another room's TV.
- **Works on hotel WiFi**  
Built for VLAN-segmented guest networks.
- **The Cast button just works**  
YouTube, Disney+ & Spotify, as guests expect.
- **Appliance per property**  
A small Gateway server bridges it securely.

In development — available as an add-on. Requires the Gateway server (hardware & setup quoted per property).

# Beyond Android TV

• COMING SOON

Bringing the Dominate experience to the hospitality displays hotels already own.

## LG webOS

LG commercial / Pro:Centric hospitality displays.

PLANNED

## Samsung Tizen

Samsung hospitality (LYNK / Tizen) displays.

PLANNED

## One platform, more screens.

Run the same managed guest experience on LG and Samsung hospitality TVs — letting hotels adopt Dominate without replacing displays they already have.

Roadmap — not yet available. Today's platform targets Android TV (Skyworth / TCL).

# A fraction of legacy cost

Simple per-room software pricing

## Software & CMS

**R30**

per room / month

When no additional hardware is required. Includes the full guest experience, CMS, streaming and remote management.

## PMS Integration

**R2,000 – R4,500**

setup, on application

One-off integration & setup per property, depending on the PMS. Unlocks live folio, guest name and auto-checkout.

## Guest Casting

**POA**

hardware + setup

Optional add-on. Gateway server and installation quoted per property.

**No proprietary per-room hardware. No per-feature licences.** Compare to R15,000+ per room for legacy hospitality TV systems.

# Runs on affordable Android TV

Purpose-built hotel TVs — no proprietary per-room hardware

RECOMMENDED

## Skyworth & TCL

Purpose-built hotel TVs (e.g. Skyworth SWTV-22TGS, TCL), Android TV — our primary, fully-tested platforms.

ALTERNATIVE

## Larger panels

Skyworth SWTV-24AE and larger TCL panels for suites and premium rooms.

FLEXIBLE

## Any Android TV

Other Android TV devices supported — no vendor lock-in.

# Minutes per room

Simple installation — no specialist technician required

1

## Reset & connect

Factory-reset the TV (required for existing sets), mount it and join the hotel WiFi.

2

## Run the provisioner

The Windows installer tool configures the TV end-to-end.

3

## Assign the room

Pick the TV, type the room number, click Provision.

4

## Done

Kiosk-locked and live — roughly 5 minutes per TV.

Existing in-use TVs must be factory-reset first so the app can take Device Owner / kiosk control. Provisioned with the HotelTvProvisioner tool — about 5 minutes per TV.
